

Ino Soon- Responsive Coming Soon Template

Ino Soon is a responsive coming soon page. Built on html5/css3 & it has bootstrap3 in core.

Install: At first extract the zip file. You'll find three folders [Help, Image & Slider]. Upload everything from Image or Slider Folder to your root. Don't upload the folder itself, unless you want to create a subfolder to your address. Upload everything inside you find in either "Image" folder or "Slider" folder.

Count Down Timer: Open **theme.js** file & setup your own day, month, year.

Colors: Open **style.css** & scroll down at the bottom to change the theme colors.

Pre-Loader: If you want to remove pre-loader please remove this line: [`<div class="page-loader"></div>`]

Slider: first upload some images in "img" folder, then open **theme.js** file & replace the default images with your ones.

Background Sound: If you want background sound, then first upload a mp3 file in your server, then please open **theme.js** file & find this line: mp3: "www.example.com/demo.mp3". Replace the demo address with your custom mp3 link.

Ajax Subscribe Form: We used an Ajax subscribe form for this template. Please open **mail.php** and edit **line: 17** & replace the email address with your own. You should also replace the default subject text at **line number 20** [New Subscription from Imransdesign]

But remember one thing. Some hosts prevent the user "nobody" from sending out mail to remote addresses (PHP and CGI scripts generally run as nobody). When testing your form make sure the recipient e-mail address is a local address (@yourwebsite.com) rather than a third party email provider (gmail, hotmail, yahoo, aol, your ISP, ...). For example if your form is hosted on mywebsite.com make sure the recipient address is something@mywebsite.com (a local domain e-

mail address like info@mywebsite.com, webmaster@mywebsite.com, your.name@mywebsite.com, ...).

Plugins: Please see credits section below. You'll find the links for all the plugins used in this template. Go & try to find out the usage instructions from there.
